Raised in Europe and on New York's gritty Lower East Side among iconic figures like Allen Ginsberg, Richard Hell, Debbie Harry, the Ramones, Andy Warhol and the Clash, Harley began his own musical career at age 11, performing at legendary hangouts like Max's Kansas City (where he first met The Misfits) and CBGBs, as the drummer for the classic NYC Punk band, the Stimulators.

By the early 80s Harley founded the seminal Hardcore band, Cro-Mags, writing the majority of their music and channeling his powerful survival instinct into the blistering soundtrack and storyline for the 80's and 90's.

“Harley Flanagan’s incredible story is not just the history of New York hard core, of which he is a founding father, but a history of New York itself,” wrote dear friend and fan, Anthony Bourdain, for the cover of Harleys critically acclaimed memoir, **Hard Core: Life of My Own**.

Dave Grohl, among others have often said, there would be no Metallica, Green Day or Foo Fighters without the Cro-Mags. In March 2019, Harley was featured among America’s punk pioneers and the U.K.’s most notorious bands in **PUNK**, a four-part docuseries on **EPIX** from executive producer John Varvatos and punk music legend Iggy Pop.

In a world searching for authenticity- it doesn’t get any more real than Harley. His ever-growing popularity with audiences outside of the Punk and Hardcore world, is a testament to the ORIGINS of alternative music and lost histories from the visionaries who created it.
